This program will take place in Beirã, in the Marvão Municipality, in the Portuguese region of Alto Alentejo. Local traditional urbanism, architecture and building details will be studied. Hand drawing and measuring buildings will be the main activity to be developed each day. Experts in local vernacular architecture and building techniques will be lecturing on diverse related topics. There will be trips around this region and some crafts people and building sites will be visited too. Local tradition will not only be studied, it will also be the basis for new designs adapted to local context. During the last days upgrade proposals for different public places of the town will be designed, using the previously studied patterns as a guideline for them.

Coordination:

Alejandro García Hermida (Universidad Alfonso X el Sabio | INTBAU Spain) and Rebeca Gómez-Gordo Villa (INTBAU Spain).
